SHE'S
PREGNANT

WHAT NOW?

FOR MEN:

So you think she might be pregnant. Here's some quick advice that may be of benefit to you right now:

THE DO'S

- 1 Listen.**
The situation involves more than just you. There are now three lives to think about.
- 2 Stay Calm.**
Freaking out will only magnify the negative.
- 3 Talk about it.**
Hiding it from people who can genuinely help you only increases the stress.

THE DON'TS

- 1 Don't bail.**
The more you run from this, the harder it becomes to think and act clearly.
- 2 Don't pressure her.**
Applying pressure will only push her away, possibly into a regretful situation.
- 3 Don't forget.**
You have a very active role. Listen to her and share your thoughts.
