

RELAX,  
THERE ARE TWO VERY  
IMPORTANT THINGS  
YOU SHOULD KNOW.

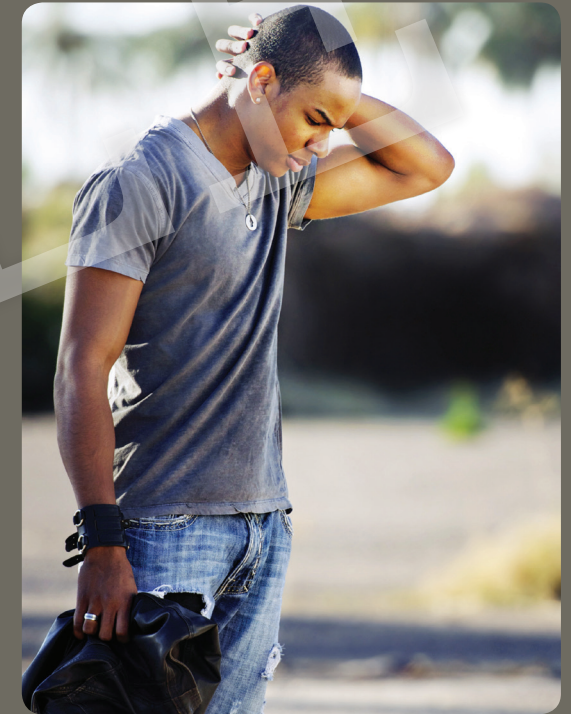

1 You are not alone!  
There are many out there  
dealing with the same  
issues.

2 Remember, our  
center has been there for  
many in your situation.

That is what we do.

We can help!

If you haven't made the  
first step, please set an  
appointment and learn  
more about the following  
life changing support  
programs we have to offer.

Think you have an STD?  
**GET TESTED**

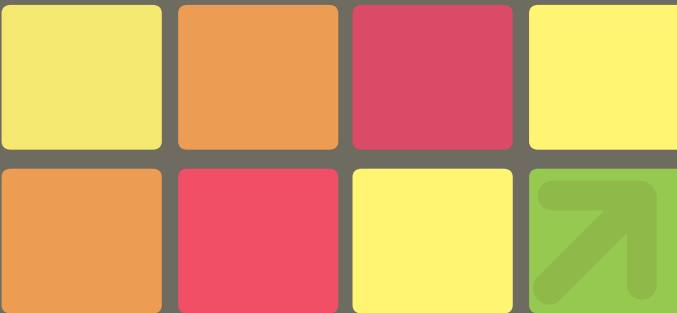

## STI Screenings

The Centers for Disease Control reports that there are 19 million new STD infections each year. The truth is that anyone who is sexually active (vaginal, oral, and/or anal) is at risk for acquiring an STD/STI. Even without symptoms, STDs can be present and passed to others. Many STDs begin without symptoms and may hide for months, even years, without surfacing. For example, 75% of women with Chlamydia have no symptoms at all. Here at The Resource Center, you can be tested for the most common STDs in a non-judgmental, confidential environment at no cost.

## What to expect:

Your screening will consist of 2 appointments with a licensed medical professional. Your visit and screening are completely confidential.

## All services are free and confidential

**FIRST VISIT** – You will meet with a licensed medical professional who will take your sexual history information, discuss your STD/STI risk, explain procedures and answer any questions or concerns you might have. This is when you will provide blood and urine samples. We send your samples to a lab for testing.

**SECOND VISIT** – A week later, you will return to our office for your results. You will meet with a licensed medical professional to go over all your test results and answer any questions you might have. If you have a positive test result, treatment and/or a referrals will be given at this time.

## Testing Includes:

- Chlamydia Testing
- Gonorrhea Testing
- HIV Testing
- Syphilis Testing

These tests can cost from \$50 - \$120 but we offer them for FREE because we care about you and your health.
