If abortion left you broken,
Don't live with

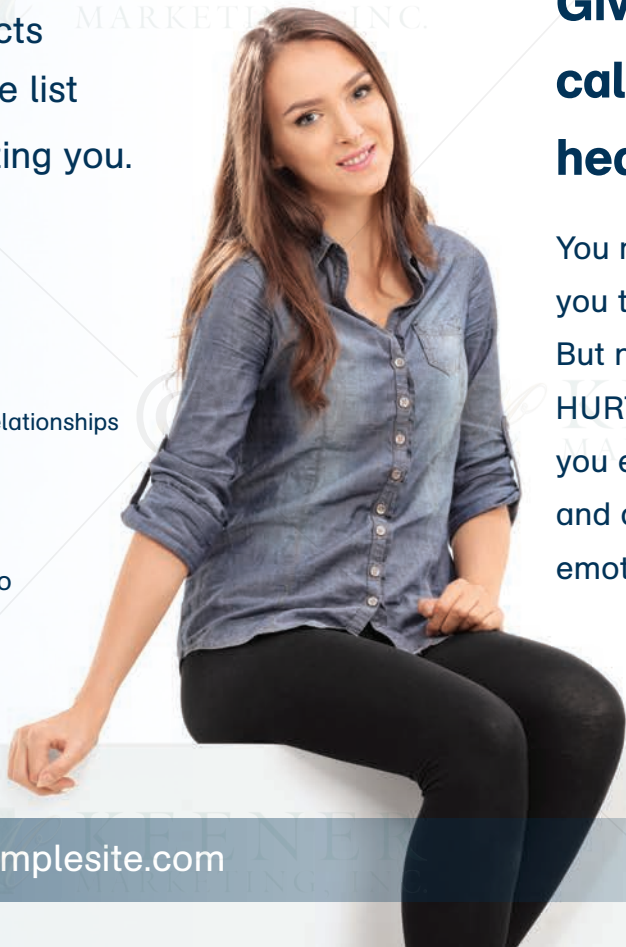

regrets

The effects of abortion are huge.

It is important to know that it affects everyone differently. Check out the list below and find out how it is affecting you.

- Emotional deadening
- Increased tendency toward anger or rage
- Feelings of loneliness or isolation
- Lower self-confidence than usual
- Suffering from insomnia or nightmares
- Greater difficulty in maintaining or developing relationships
- Increased or beginning use of drugs or alcohol

Pregnancy brings with it powerful changes and conflict. Both men and women are hard-wired to react to becoming a parent: women to nurture and men to protect. Abortion cuts short these instincts and often leaves confusion and hurt.

Give us a call and start healing today.

You made the decision you thought was best. But now it seems to be **HURTING** you more than you ever thought possible, and causing unexplained emotions and hardships.
