

In the
beginning,
God created
the heavens
and the earth...

...and God saw
that it was
good.

GENESIS
1:1, 9b

Where Life Begins

January 21, 2024

Sanctity of Human Life Sunday

When a woman discovers that she is unexpectedly pregnant, her first thought is not to call it "good". She usually thinks about what could go wrong. What if everyone leaves her? What if she has to sacrifice her education and career? What if she cannot afford the upcoming changes? What if it all proves too much for her?

These thoughts make an abortion seem like a "good" idea, but that couldn't be further from the truth. We step in to explain all the risks associated with an abortion and how harmful it can be. We then share how the creator of the universe lovingly designed her and the life that she carries. We get to watch her perspective change when she realizes that life has begun in her womb.

We know and celebrate that God has called life good, but we also know that life can be challenging. That is why we provide positive alternatives, material assistance, classes, and other resources to help women in these unexpected situations. We would not be able to help them at all if it wasn't for supporters like you.

There are so many ways you can help.
